CENTERSTONE

Centerstone Consortium Psychology Doctoral Internship 2018-2019

*AllCare Medical Centers
Site Information*

Psychology Doctoral Internship Rotations

This internship includes a major rotation (40 hours weekly). This internship is ideal for someone with varying psychology interests and someone also interested in the medical field. Interns with the ability to quickly change gears and have an ease to work with all ages are particularly suitable.

Medical Psychology (Major Rotation)

The intern will provide psychological services to a range of patients including children, adolescents, adults and seniors. Interns will be working in both outpatient and inpatient settings. Therapy will be a component of this internship, providing therapeutic services to couples, children, individuals, and families. Diverse mental health and medical conditions, are common with many of the populations that will be presented.

General Experience Information

AllCare is a family owned organization providing primary healthcare to patients of all ages, from newborn to aging adults. A psychological component is integrated throughout the primary healthcare practice, concentrating on the necessity to concurrently treat both the mind, as well as the body.

- Interns will provide psychological services, including individual and family therapy, to an outpatient population to children, adolescents, adults, and geriatrics that present with acute mental health issues.
- Interns will have the opportunity to provide neuropsychological assessments to patients that present with medical, psychological, and neuropsychological, conditions.
- Interns will also provide comprehensive psychological assessments to children, adolescents, and adults for diagnostic clarity and treatment planning.
- Interns will be providing these services in office, skilled nursing, and hospital settings.

Didactics and Supervision

Didactics

Centerstone Consortium offers over 100 hours of didactic training in a variety of areas. Major training topics include: neurological issues in child assessment, co-occurring disorders, trauma-informed practice, integration with other disciplines/ primary care, & professional development as a psychologist.

Each year the training interests of the interns are taken into account in providing specialty clinical training. Per the request of our interns, on-line trainings have also been incorporated into our curriculum. However, formal, didactic face-to-face contact for interns also occurs regularly.

Supervision

Supervision is always provided by a licensed psychologist associated with that rotation.

For 2018-2019, Dr. Matthew Nessetti, Ph.D. will be providing the supervision for the internship.

Centerstone uses the Online APPIC Application Materials. In addition, this location requires an integrative psychological assessment.

Completed packets for 2018-2019 must be submitted no later than November 3, 2017. Incomplete packets will not be reviewed.

Prospective interns will be contacted to arrange for interviews.
